¹ The general timing by county applies to all fresh and brackish streams within that county, unless specific timing is listed for a specific stream or streams in that county. If a specific stream is listed, the timing for that stream supersedes the general timing listed for the county. The Columbia and Snake Rivers are listed separately from the counties through which they run.

² Lowland lakes. For lakes that are part of a stream (reservoirs and wide spots in the river), e.g. Lake Roosevelt which is actually the Columbia River, the stream timing applies.
